About SaPramana

SaPramana transforms ordinary packaging and documentation
into smart, secure, and connected assets.
Our technology suite combines **QR Labels, Microdots, and Voice Print Technology (VPT)**
to help brands combat counterfeiting, enhance visibility, and build customer trust —
all through seamless, scalable integration.

Safety isn't optional,
we make it essential!

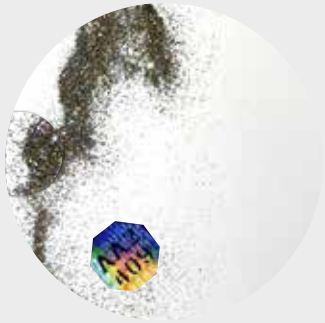

Precision Security Tracking

Logs each scan with key details (date, time, location) for enhanced security analysis.
Advanced Anti-Spoofing protects QR codes from duplication, ensuring only authorized products are recognized.

NANO Protektor

Microdots:
Tiny tech. Massive security.

Safeguard your valuables, secure your legacy.

Offers personalized asset protection, shielding your most precious possessions from unexpected events and uncertainties.

Document Authentication

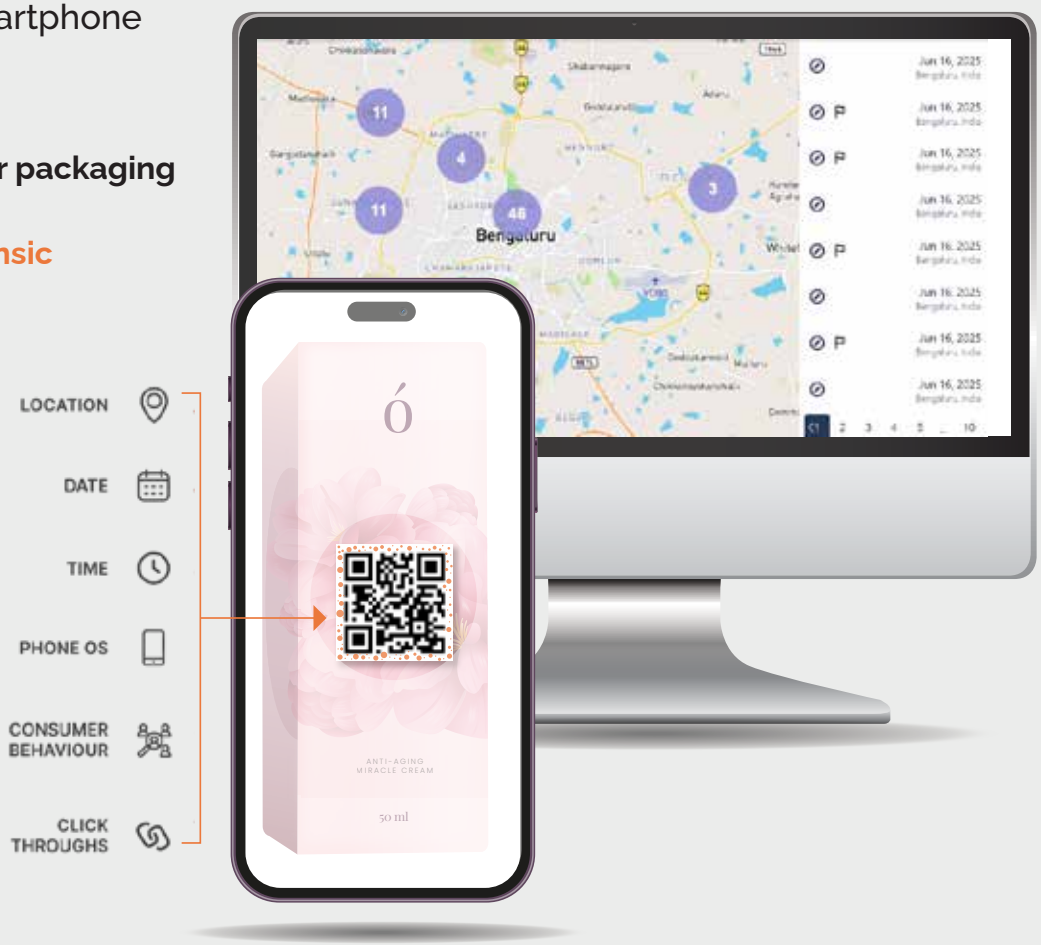

VPT is an advanced authentication solution that embeds encrypted voice data directly into documents, creating a unique, tamper-proof security layer.

A Hidden Digital Gateway to Trusted Product Experiences

Every scan captures vital data - **date, time, location, and user engagement** - on the SaPramana Product Cloud.

It enables real-time product traceability, counterfeit detection, and analytics, accessible via any smartphone (no special app required).

- **Seamlessly embedded into product logos or packaging**
- **Triple-layer protection:** Overt | Covert | Forensic
- **Real-time data insights for brand protection**
- **Integrates with IoT & CRM systems**
- **Quick to implement, cost-effective at scale**

SaPramana makes it easy

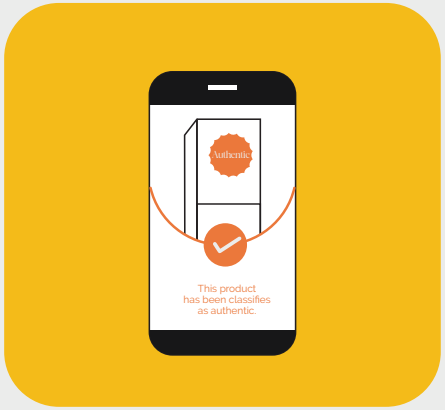

Easy smartphone scannability unlocks a world of benefits.

Effortless smartphone scanning

Distinct security code for every product

Real-time verification and tracking

Access exclusive brand interactions

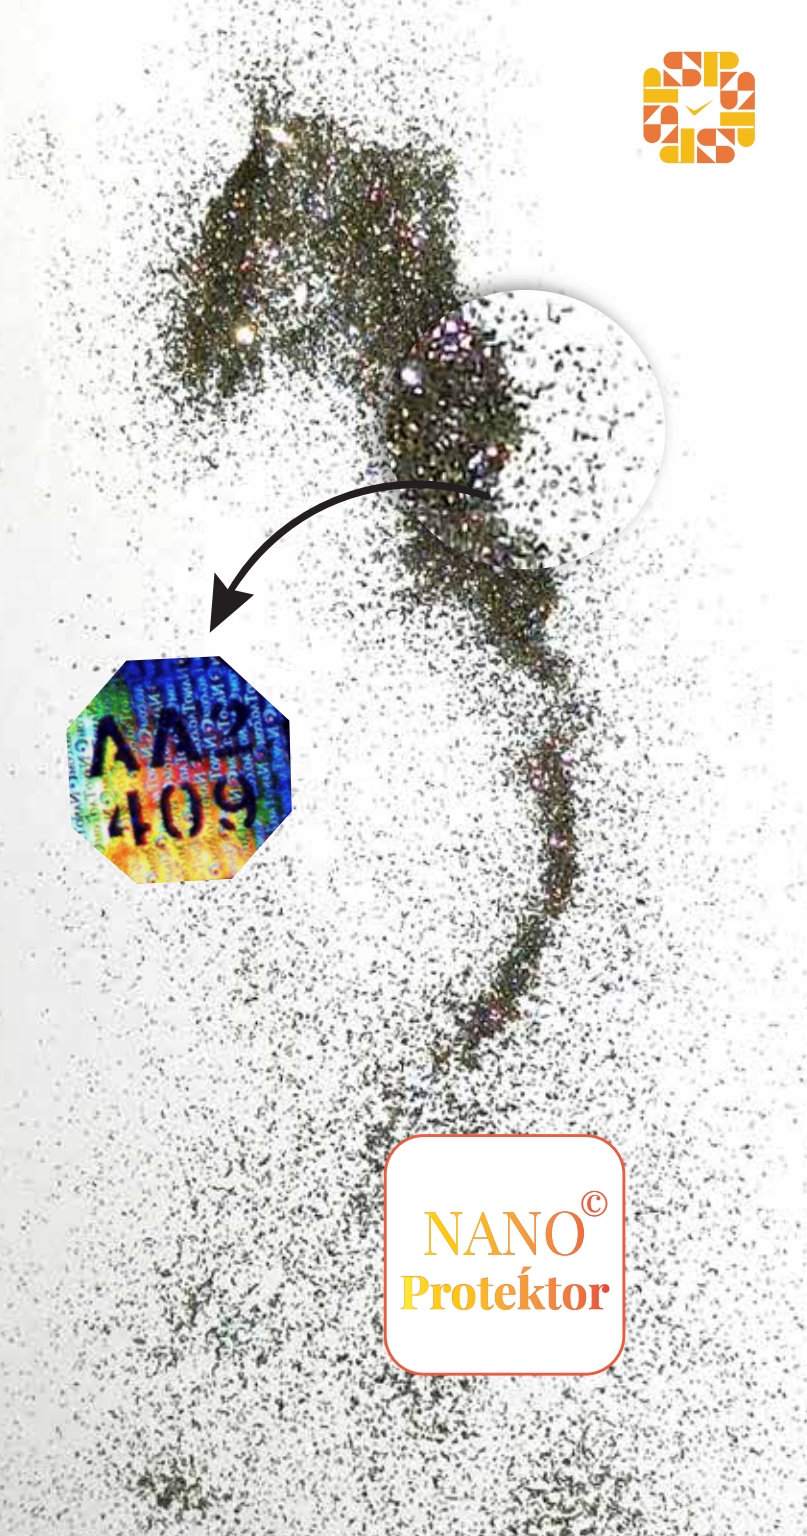

Microdots:
Tiny tech. Massive security.

Invisible, Indestructible, and Unique

Inspired by human DNA, NANO Protektor Microdots give every object a unique, invisible ID.

These microscopic metallic dots are tamper-proof, weather-resistant, and impossible to replicate — offering covert, forensic-level asset protection.

- **Tamper-proof & invisible to naked eye**
- **Unique, traceable ID on every dot**
- **Instant, on-the-spot verification**
- **Durable in any condition**
- **Works across industries — auto, pharma, electronics & more**
- **Forensic identification in case of theft or dispute**
- **Works across all material surfaces**

Guard what matters, with SaPramana

Voice Print Technology

When Documents Speak for Themselves

VPT embeds **encrypted voice data** into printed documents, transforming them into **talking proof of authenticity.**

By tapping with the decoder pen the original voice playback confirms the document's legitimacy.

- **Embedded encrypted voice data**
- **Instant authentication**
- **Tamper-proof & copy-resistant**
- **No dependency on internet or apps**
- **Unique voice signature – as distinct as a fingerprint**

Because authenticity deserves more than just a signature

VPT

Ever wished a document could tell you it's real?

Now it can.

VPT: Proof, revealed.
